TEMPORARY COMPATIBILITY SOLUTION FOR XM DIRECT 2 AND WINDOWS VISTA

6/11/08

Audiovox has created a temporary solution for the current XM Direct2 software to work with Windows Vista.

INSTRUCTIONS

1. If the XM Direct2 program is successfully downloaded to a PC (and the USB driver is installed) double click the MY COMPUTER icon on the desktop.
2. Once this opens, double click on the "C" drive icon.
3. Double click on the "Program Files" folder.
4. Double click on the "XM Direct2" folder.
5. Right click on the "usbprog" icon and select "Properties".
6. Select "Compatibility" from the top tabs.
7. In the section "Compatibility Mode", check off the box that reads – *Run this program in compatibility mode for:*
8. Select Windows XP in the drop down menu and hit "OK".

This will allow Windows Vista computers to run the XM Direct program under the XP platform. This will only affect the way the XM Direct2 software runs.

This has been tested many times and it has proven successful, but please note that this is only a temporary fix since Audiovox is creating a Vista version long-term.

If you have additional questions, please contact your Audiovox or XM Satellite Radio representative.
